

About Aqua ATS

Aqua is an electronic trading solution that facilitates block trades in NMS stocks. The central feature of Aqua is its unique “Go Fish” method of matching orders. With the “Go Fish” method, liquidity providers (either buy-side, Outsourced Buy-side Desks or Broker-Dealers) submit block-sized orders into Aqua, bidding or offering to buy or sell a particular equity security at a price to be determined based on a peg to the national best bid or offer (“NBBO”) at the time of execution — including either at the NBBO, at the midpoint of the NBBO, or at a spread inferior to the NBBO. Aqua only accepts orders priced by reference to the NBBO.
